

REMOTE E-SIGN

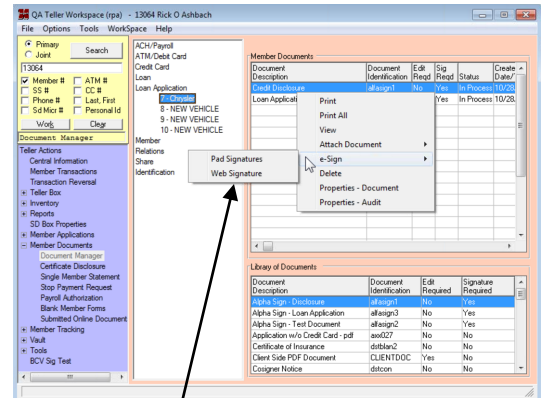

Sharetec's Remote E-Sign allows your loan officers to electronically transmit loan documents directly from Sharetec to your members for their electronic signature.

The Benefits:

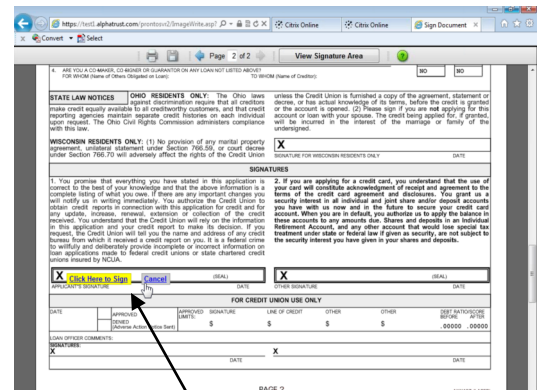

Your employees have access to all necessary loan documents without leaving their desk! Simply select the member number and all of the documents for that member are accessed from one location in the system. No more searching for the loan folder or documents that have been misfiled. Everything is at your fingertips.

- Dramatically speed up the document signing process.
- Members can now sign documents anywhere as long as they have an internet connection and access to their e-mail.
- No more mailing loan documents and wondering when they will be signed by the member and returned.
- Have you had loan documents returned signed but in the wrong spot and or by the wrong person? Remote E-Sign prompts the borrower and co-borrower where to sign.
- Remote E-Sign automatically transmits loan documents to the borrower for their signature and then transmits the documents to the co-borrower for their signature.
- Electronically encrypted file.
- Audit trail to track documents and where they are signed.
- Saved in PDF format.
- Electronically stored in Loan Documents for easy retrieval through the Loan Workspace.
- Completely integrated with Sharetec and it eliminates the need for a 3rd party solution.

Why choose a 3rd party solution that will have more steps, will be more time consuming, reside outside of the core system, and will not be attached to the loan record? Sharetec has solved this with the new Remote E-Sign software!!!

Select Web Signature to start the document process.

Prompts the member to electronically sign the loan document.
